### PROFESSIONAL SUMMARY

Computer Science graduate (COMSATS University Islamabad) with a strong foundation in Python, SQL, and Machine Learning. Experienced in cleaning and analyzing large datasets, building data visualizations, and developing ML models — including improving a career-recommendation model's confidence from 35% to 78%. Comfortable turning raw, messy data into actionable insights and working predictive models.

### EDUCATION

**Bachelor of Science in Computer Science** | COMSATS University Islamabad, Sahiwal Campus 2022 - 2026

- CGPA: 3.52

### SKILLS

**Languages & Libraries:** Python (Pandas, NumPy, Scikit-learn, Matplotlib), SQL, C++

**Data & ML:** Machine Learning, Data Cleaning & Preprocessing, Data Visualization, AI Agents, Prompt Engineering

**Also Familiar With:** Node.js, MongoDB, OOP, Git, GitHub

### PROJECTS

**Netflix Dataset Analysis** | Python, Pandas, Matplotlib

- Cleaned 7,000+ Netflix records, resolving missing values, duplicates, and inconsistent data types to prepare the dataset for analysis.
- Built 5+ visualizations uncovering key content trends: movies make up 70% of content, the US leads content volume, and output grew sharply post-2015.
- Translated raw catalog data into clear, presentable insights on content strategy and platform growth.

**Final Year Project - CareerCompass (ML & Data Components)** | Python, Pandas, Scikit-learn, MongoDB

- Boosted ML career-recommendation model confidence from 35% to 78% by removing synthetic training data and retraining on cleaned, real-world datasets.
- Built resume-screening and skill-gap analysis features using Python and Pandas, translating job market data into personalized skill recommendations.
- Analyzed job market datasets to identify hiring trends and map recommended skills to career paths for student users.

**Weather App** | JavaScript, OpenWeatherMap API

- Built a real-time weather app with geolocation detection and Celsius/Fahrenheit conversion.
- Handled API errors and user permission denials for reliable cross-browser behavior.

**Personal Portfolio** | HTML, CSS, JavaScript

- Built a responsive portfolio site with project showcase, live links, and a contact form.

**Seat Reservation System** | C++, File I/O

- Built a flight booking system with ticket generation and persistent data storage.

**Tic-Tac-Toe Game** | C++, OOP

- Built a console game with input validation and win-condition logic.

### EXPERIENCE

**Skill Development Coordinator** | Skill Development Society, CUI

- Coordinated 25+ volunteers and 5 trainers across 8 workshops.
- Managed student registrations, feedback collection, and session scheduling.

**Outreach Lead** | Computer Science Society (CSS), CUI

- Managed LinkedIn content and outreach campaigns.
- Approached and onboarded external partners for collaborations.

**CERTIFICATES**

---

- Deep Learning Specialization - deeplearning.ai (Andrew Ng)
- Introduction to SQL - DataCamp
- AI Agents Fundamentals - deeplearning.ai
- Introduction to Git - Microsoft
- Introduction to Python - Kaggle
